

## EQACC SOLAR

# Lisbon PV Panel Project

## Overview

---

Portuguese utility EDP (ELI:EDP) announced on Thursday it will install 5.1 MWp of solar panels on the roofs of the Lisbon International Fair (FIL), creating the largest solar neighbourhood in Portugal. How to optimize solar generation in Lisbon Portugal?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Lisbon, Portugal as follows: In Summer, set the angle of your panels to 23° facing South. In Autumn, tilt panels to 43° facing South for maximum generation.

How many solar PV locations are there in Portugal?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 155 locations across Portugal. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: [Solar PV potential in Portugal by location](#).

How many solar panels are installed in Lisbon in 2016?

all available roofs had PV, the solar electricity produced would represent 95% of the city's electricity consumption in 2016. 4 MW PV installed in Lisbon, of which 23% were licenced under the microgeneration regime, 42% under the mini-generation regime and 35% in the self-consumption regime.

How many PV systems are installed in Lisbon?

4 MW PV installed in Lisbon, of which 23% were licenced under the microgeneration regime, 42% under the mini-generation regime and 35% in the self-consumption regime. The 4 MW PV installed capacity corresponds to 322 systems, of which 78% are microgeneration systems, 3,68 kW being the most common interconnection capacity declared per system.
