

**EQACC SOLAR**

# **Lisbon Solar Grid-connected System**

## Overview

---

Will new solar energy projects connect to the grid in Portugal?

The Portuguese Ministry of the Environment has approved a new set of solar energy projects to connect to the grid, in collaboration with grid operators REN and E-Redes. It marks the first time since June 2019 that the Portuguese government has ensured the integration of fresh PV capacity into the power network.

How many GW of grid-connection permits does Portugal have?

Portugal's Ministry of the Environment has awarded 5 GW of grid-connection permits, primarily for PV projects. These permits cover 5 GW for power plants linked to the high-voltage transmission network and an additional 1 GW for projects connected to E-Grids at lower voltage levels.

What is Solis & how will it help Lisbon (Portugal)?

SOLIS will support the development of an inclusive solar community in Lisbon (Portugal)! Lisboa E-Nova, the Energy and Environment Agency of Lisbon, is launching in 2019 SOLIS, the Lisbon Solar Platform 1 (fig. 1).

How many solar panels are installed in Lisbon in 2016?

all available roofs had PV, the solar electricity produced would represent 95% of the city's electricity consumption in 2016. 4 MW PV installed in Lisbon, of which 23% were licenced under the microgeneration regime, 42% under the mini-generation regime and 35% in the self-consumption regime.

## Lisbon Solar Grid-connected System

---

### Grid-connected solar power doubled in 2024

In 2024, solar power generation reached 4,899 GWh, representing approximately 10% of total consumption in the public grid (51.4 TWh), a 37% increase compared to 2023. ...
