Lisbon charging station energy storage

Overview

Where are the charging stations located in Lisbon?

The charging stations are located on Rua do Município, in the public parking area and next to the P1 parking area on Rua Manuel Bentes Júnior. They represent a total investment of €20,000 and are part of an initiative to provide a valid alternative to petrol or diesel cars and to meet the increasing demand for charging stations.

How will Portugal improve grid resilience after April blackout?

Government outlines €400 million plan to strengthen grid resilience after April blackout. Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader €400 million package aimed at improving grid reliability and preventing future blackouts.

What is a charging management dashboard & how does it work?

It allows for dynamic and intelligent on-site charging management. The dashboards, which are intuitive and easy to use, present comprehensive information to the building manager or operator who can instantly view all information about each charger, as well as monitor energy consumption in real time.
