

## EQACC SOLAR

# Lithium-ion batteries for telesolar container communication stations in Honiara

## Overview

---

What are the lithium-ion batteries in containers guidelines?

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future.

Can a sodium ion battery be transported under state approval?

All cells and batteries must be tested in accordance with the UN Manual of Tests and Criteria Part III Subsection 38.3 (DGR 3.9.2.6) Passed UN Test?

No May only be transported under State Approval as per Special Provision A88 Yes Sodium Ion Batteries (limited to a maximum of 30% SoC) Sodium Ion Batteries Packed with Equipment.

When should lithium ion cells & batteries be offered for transport?

It is recommended that lithium-ion cells and batteries (Section I & II) are offered for transport at a state of charge not exceeding 30% of their rated capacity. From 1 January 2026 Section I Lithium-ion cells and batteries must be offered for transport at a state of charge not exceeding 30% of their rated capacity.

When will lithium ion batteries be available for air transport?

From 1 January 2026, lithium-ion batteries that are packed with equipment and vehicles powered by lithium ion or sodium ion batteries must be offered for air transport with the battery at a reduced state of charge, unless otherwise approved by the relevant tates (A331).S
