

EQACC SOLAR

London double glass solar curtain wall supplier

Overview

What is OCL curtain walling?

OCL designs and installs high-performance curtain walling systems for commercial, residential, and public buildings. Durable, energy-efficient, and bespoke solutions.

What is curtain walling?

Curtain walling is an exterior facade system that is attached to the structural frame of a building but does not bear any load from the building itself. It primarily serves to protect the interior from weather while allowing for expansive glazing, creating sleek, modern appearances with plenty of natural light.

What are the benefits of curtain walling?

Curtain walling significantly enhances the thermal efficiency of a building. Our systems are designed to reduce heat loss, helping to lower energy costs while maintaining a comfortable indoor environment. Double or triple glazing options further improve thermal insulation. 4.

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.
