# **Lte power generationfdd mobile energy storage site inverter grid connection**

Voltage range:691.2-947.2V

>6000 cycles(100%DOD)

Rated battery capacity:  
216KWH (customizable)

EMS communication:  
4G/CAN/RS485

## Overview

---

Can grid-forming energy storage plants strengthen renewable power plants?

Grid-forming energy storage plants can strengthen renewable power plants and provide stable support during transient states, improving local grid integration of renewable energy.

What are mobile energy storage resources (MESRS)?

On the one hand, the proliferation of electric mobility has led to mobile energy storage resources (MESRs), including electric vehicles (EVs) and mobile energy storage systems (MESSs), becoming valuable power sources to address load demands during major power outages .

Is CR power a grid-forming energy storage project?

The CR Power\* 25 MW/100 MWh grid-forming energy storage project has successfully passed unit, site, and system-level tests, including high/low voltage disturbance, phase angle jump, low-frequency oscillation, damping performance, and grid following/grid-forming mode switching tests, making it the world's first of its kind.

How does a V2G station work?

A V2G station in this UTN functions as a DG during outages, gathering 300 kW of output power from EVs for load restoration. The PDN requires control over the power lines to restore this output power to specific loads. Additionally, more EVs are required to arrive and connect to the V2G station to restore further loads.
