# **Mainstream products of energy storage batteries in Eastern Europe**

## Overview

---

How can European policymakers help the battery storage sector?

Recommendations How can European policymakers help the battery storage sector? Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price volatility.

Is there a market for large-scale battery storage in Central Europe?

In many countries in Central Europe, the market for large-scale battery storage is growing rapidly. The drivers are diverse, but there are still obstacles, as Eliza Stefan, Sales Manager BESS for Central & Eastern Europe, Jinko EES, points out.

What are the key market trends for battery storage?

It covers key market trends, with a particular focus on the shift toward utility-scale storage, the continuing growth of residential and commercial installations, and the evolving role of battery storage in supporting Europe's clean energy goals.

Which countries are leading the battery storage market in 2024?

Germany, Italy, and the UK continue to lead the market and deliver almost 70% of the annual capacity. In 2024, Europe's top three battery storage markets – Germany, Italy, UK – solidified their dominance, with Austria and Sweden closing the 'top 5' ranking (see Fig. 2). 2024 marked the first year when new capacity additions
