# **Mauritius energy storage exports**

## Overview

---

Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

How has the Mauritian government changed the energy sector?

The Mauritian government has made significant changes in the energy sector. In particular, it created the Mauritius Renewable Energy Agency (MARENA) in 2016 to promote the use of renewable energy in Mauritius.

Where can I find information on energy access in Mauritius?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Mauritius on the IEA homepage. Find relevant information for Mauritius on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How is electricity generated in Mauritius?

Electricity in Mauritius is generated primarily by the Central Electricity Board (CEB), which is the sole agency for transmission, distribution, and sale of electricity. Renewable electricity is derived from sources such as hydro, wind, landfill gas, fuelwood, and solar. Mauritius falls under the Ministry of Energy and Public Utilities.
