

EQACC SOLAR

Megawatt-scale battery energy storage in the Netherlands

- LiFePO₄
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life: \geq 6000
- Warranty :10 years

Overview

What is a battery energy storage system (BESS)?

RWE has officially commissioned its first large-scale Battery Energy Storage System (BESS) in the Netherlands at the Eemshaven power station. With a total capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt hours (MWh), the system will be crucial in balancing the power supply and demand within the Dutch electricity grid.

What is the Eemshaven battery project?

The Eemshaven battery project is RWE's first large-scale battery storage project in the Netherlands with an installed capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt hours (MWh). That is equivalent to powering 3000 EV chargers at once. 110 lithium-ion battery racks are installed at the Eemshaven power plant.

How big is the energy transition in the Netherlands?

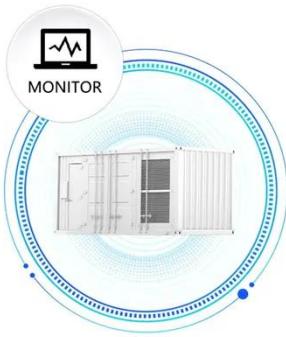

ESNL adds to the numbers. The energy transition in the Netherlands gets a powerful boost: follows the data from CBS counted at the end of 2024 our country 84 large-scale battery storage systems (≥ 1 MWh), accounting for a combined capacity of 350 megawatts (MW) and a total storage capacity of 620 megawatt hours (MWh).

How has the battery industry changed in the Netherlands?

The growth is nothing short of impressive. In one year, the number of large-scale batteries in the Netherlands more than doubled: from 40 in 2023 to 84 in 2024. Storage capacity increased by 81 percent, from 343 to 620 MWh. Installed capacity also increased significantly: from 229 MW to 350 MW, an increase of 53 percent.

Megawatt-scale battery energy storage in the Netherlands
