# Mobile base station equipment Huawei power supply module

## Overview

---

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

What is Huawei site power facility?

Huawei Site Power Facility offers energy-efficient, low-carbon power supply solutions, enabling carriers to build environmentally sustainable, resilient networks for modern telecommunications infrastructure.

What are Huawei power products?

Power products include systems for indoor, outdoor, embedded, and Central Office (CO) applications. They include Distribution Power Systems (DPS) and hybrid power, as well as a site energy management system. Huawei telecom power products adapt easily to a variety of telecommunication networks.

What types of power systems does Huawei offer?

They include Distribution Power Systems (DPS) and hybrid power, as well as a site energy management system. Huawei telecom power products adapt easily to a variety of telecommunication networks. We also offer integrated power solutions for intelligent video surveillance systems and solutions for site sharing of tower vendors.

## Mobile base station equipment Huawei power supply module

### PowerPOD FusionPower6000 , Huawei Digital Power

Huawei FusionPower6000 provides a high-efficiency, scalable power solution for data centers and EV charging, ensuring reliable, sustainable energy with optimized performance and cost ...
