Morocco Communications 5G Base Station Planning

Overview

How long does it take to build a 5G network in Morocco?

Studies are currently being conducted to propose the conditions and modalities for operating 5G networks in the Kingdom in order to identify and prepare the target frequency spectrum rearrangement schemes. As 4G took 10 years, the construction of the 5G network in Morocco for a wide deployment throughout the country could take years.

Is there a 5G project in Morocco?

The Moroccan government has not given any information about 5G cybersecurity, it will only be launched once the regulator decides to allocate licenses. 9. Is there any project regarding 6G in your jurisdiction?

.

Which bands should be used for 5G in Morocco?

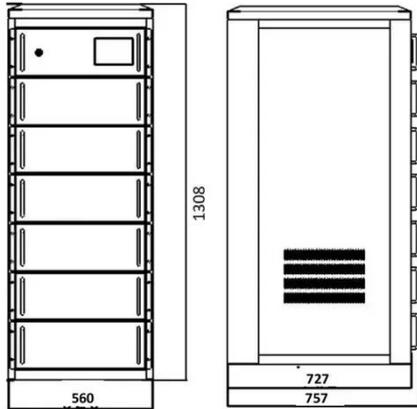

In Morocco, we would recommend that the 800 MHz (CDMA) and 3500 MHz (BWA) bands are examined to determine their potential for 5G. We understand that the 3500 MHz band is already being studied for 5G.

What is the Morocco digital 2030 strategy?

November 2024 update: As part of the Morocco Digital 2030 strategy, it has been stated that works will be implemented to reconfigure the frequency spectrum, to liberalize the bands used for the 5G and to connect base transceiver station) sites with fibre optic connections. 3. What public tenders have awarded spectrum licences ?
