# **Morocco s new energy storage pricing mechanism**

## Overview

---

Will Morocco develop a gas-fired power plant in 2025?

On April, Morocco's Ministry of Energy Transition and Sustainable Development launched a call for expressions of interest to develop an integrated infrastructure for natural gas reception, storage, re-gasification, and transport, alongside a gas-fired power plant.

What is the National Energy Strategy in Morocco?

T 0: after 2009 national energy strategy until 2023 The National Energy Strategy (NES), a strategic plan for energy transition in Morocco, was established in 2009 with ambitious objectives, aiming to diversify the energy mix and promote the development of renewable energy, and reduce the use of fossil fuels.

How has Morocco transformed its energy sector?

Morocco's energy sector has undergone significant transformations, with the government implementing strategies and policies to address climate change and promote the transition to renewable energy and energy efficiency that generalizes across all related sectors of the economy (housing, transport, industry).

How much solar power does Morocco have?

Morocco has an average solar potential of five kilowatt hours (kWh) per square meter per day, although this varies geographically. Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power.
