

## EQACC SOLAR

# Muscat makes outdoor power

## Overview

---

Summary: Explore how Oman Outdoor Power Company delivers cutting-edge power solutions for industries like construction, event management, and renewable energy. Will Oman slash its emissions to 50 percent by 2030?

State-owned PDO which aims to slash its emissions to 50 percent of 2019 levels by 2030, is an early pioneer in large-scale solar power projects in Oman. Oman's integrated oil and gas company OQ is also seeking international partners to replace 40 percent of its three-gigawatt power consumption with renewable energy projects.

What is Oman's largest solar power project?

Commercial operations of Oman's largest utility-scale solar photovoltaic, independent power project, Ibri 2, started in January 2022. Oman Power and Water Procurement Company (OPWP) awarded the project to a consortium of Saudi and Kuwaiti firms, for which Beijing-based Asian Infrastructure Investment Bank (AIIB) loaned \$60 million.

Will Oman achieve net zero emissions by 2050?

Oman has committed to net zero emissions by 2050. The government is looking to expand its electricity-generation capacities through renewable independent power projects (IPP), with plans to derive at least 30 percent of electricity from renewables by 2030, mainly through onshore wind and solar projects.

How many electric vehicles will Oman have by 2040?

According to the ministry's estimates, Oman will have at least 22,000 new electric vehicles (EV) by 2040. From July 2023, Oman implemented customs and tax incentives and facilities to encourage the acquisition of EVs and achieve zero neutrality in the transportation sector.
