

# Nepal underground energy storage project

## Overview

---

Why should we study pumped storage systems in Nepal Himalayas?

Nepal Himalayas provide an ideal testbed to study pumped storage systems given high topographic gradients, large flow fluctuations, and prevalent energy demand patterns.

Can solar PV be integrated with pumped hydro storage in Nepal?

Integrating Solar PV with Pumped hydro storage in Nepal: A case study of Sisneri-Kulekhani pump storage project Hydropower Development in Nepal - Climate Change, Impacts and Implications Mool PK, Wangda D, Bajracharya SR, Kunzang K, Raj Gurung D, Joshi SP.

Can a geospatial model predict energy storage capacity across the Nepal Himalayas?

In this study, we configured a geospatial model to identify the potential of PSH across the Nepal Himalayas under multiple configurations by pairing lakes, hydropower projects, rivers, and available flat terrain, and consequently estimate the energy storage capacity.

How are pumped storage hydropower schemes distributed in Nepal?

Strip distribution of technically viable pumped storage hydropower (PSH) schemes at different elevation bands (EB1: 0---500 m, EB2: 500---1000 m, EB3: 1000---2000 m, EB4: 2000---3000 m, and EB5: 3000---5000 m above sea level) across Nepal.
