

**EQACC SOLAR**

# **New Outdoor Power Kit**

## Overview

---

What is a solar power kit?

A solar power kit is a portable setup that includes a solar panel you can place at your campsite when you need power for various devices, such as power tools, a laptop, or a camping stove.

What does a full solar kit include?

A full solar kit includes a portable solar panel setup that you can place in your campsite when you need power for things like power tools, a laptop, or a camping stove. You can also find outdoor solar lights in the kit to place around your campsite for added safety and security.

Which Jackery power station should I buy?

Think of the Jackery 300 Plus as the junior model of our best overall pick. Lightweight at just under 8 pounds, this 300-watt, 256-watt-hour capacity power station is appropriate for short camping and road trips where you need to keep devices charged and have some AC power on hand, too.

What is a good RV power supply?

That can be very useful for keeping track and being notified when power levels are low. For even more power (at a higher price point) we recommend the AC200L, which is a step up across the board and a good choice for RVs. Think of the Jackery 300 Plus as the junior model of our best overall pick.
