

EQACC SOLAR

New energy battery cabinet detection communication power supply

Overview

Indoor (external) type integrated cabinet, realizing multi-level modular design. Modular switching power supply, dynamic loop monitoring unit, fiber optic wiring unit, and battery backup unit can be integrated in one cabinet. It provides stable and reliable power protection and installation space for base station equipment, realizes minimal and rapid deployment, one-stop operation and maintenance, and helps 5G network evolution to be faster, more economical and simpler, and realizes a significant reduction of operation cost. What is an integrated energy cabinet?

As one of our highlights, the integrated energy cabinet integrates multiple functions such as power distribution, environment monitoring and safety protection into one, providing a full range of energy management and protection for communication sites.

What makes a reliable communication base station?

The solution adopts new energy (wind and diesel energy storage) technology to provide a reliable guarantee for the stable operation of communication base stations.

What is DC power distribution & telemetry?

DC power distribution: Configuration $16A \times 2 + 32A \times 3 + 63A \times 3$, battery tap $125A \times 4$. Telemetry: Battery system and battery pack capacity (SOC), total voltage, cell voltage, charging current, discharging current, temperature and so on.

New energy battery cabinet detection communication power supply

Telecom Cabinet Communication Power + PV + Storage: Key ...

Combining solar power, energy storage, and communication power in telecom cabinets boosts reliability and cuts energy costs. Proper sizing of solar panels and batteries ...
