# **New solar panels in North America**

## Overview

---

Are solar panels made in USA?

Yes, solar panels are manufactured in the USA. In Q1 of 2025, about 8.6 GW of solar module manufacturing capacity was added to the record. Who is the largest manufacturer of solar panels in the US?

First Solar is the largest manufacturer of solar panels in the US with a production capacity of 10.6 GW as of June 2025.

How much solar power did the US install in Q2 2025?

The US solar industry installed 7.5 gigawatts direct current (GW dc) of capacity in Q2 2025, a 24% decline from Q2 2024 and a 28% decrease since Q1 2025. Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW installed.

Are solar panels becoming more popular in the US?

Recent statistics by the Solar Energy Industries Association (SEIA) show a significant 71% increase in American solar panel manufacturing capacity in Q1 2024, with the industry reaching 200 gigawatts. In response to global supply chain challenges, there's been a significant shift toward producing US-manufactured solar panels.

How much solar power does the US have in 2025?

Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW installed. Combined, solar and storage accounted for 82% of new capacity in the first half of the year. The US added 4.3 GW of solar module manufacturing capacity in Q2, bringing the total to 55.4 GW.
