North Macedonia Glass solar Power Plant

Overview

Is North Macedonia a burgeoning market for solar energy production?

This shift underscores North Macedonia's potential as a burgeoning market for solar energy production, particularly as the country aims to meet its ambitious renewable energy targets. The regulatory landscape for renewable energy in North Macedonia has been markedly transformed with recent changes adopted in April 2023.

What is happening in North Macedonia's solar energy landscape?

A significant turning point in North Macedonia's solar energy landscape occurred in December 2020 with the launch of the first 1.48 MW solar plant by EVN Macedonia in Voshanci. This project utilized innovative two-sided panels that enhance electricity production through reflection.

What is North Macedonia doing to boost energy investment?

North Macedonia has drafted the first laws and agreements on strategic investments in the energy sector, a model the country is using to facilitate and speed up investments in renewable electricity plants. The first four projects are solar power plants Pehčevo and Stipion, cogeneration facility Skopje, and a photovoltaic plant with gas engines.

What is the future of solar energy investment in North Macedonia?

With the government targeting a 38% share of renewables in gross final energy consumption by 2030 and proposing substantial investments totaling approximately US\$1.7 billion by 2030, the future of solar energy investment in North Macedonia appears promising and critical for the nation's energy transition.
