Nouakchott large UPS uninterruptible power supply

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

What is the power capacity of a UPS?

An uninterruptible power supply (UPS) supports power capacities from 400 kVA to 1600 kVA. It features hot-swappable 100 kVA/3U power modules, allowing high scalability and efficient space utilization.

How does a ups protect a device from sudden power failure?

An uninterruptible power supply (UPS) protects valuable devices from sudden power failures by providing backup power during power outages. This ensures a steady power supply to connected devices.

What is a static bypass switch in a UPS?

A static bypass switch in a UPS provides an alternate power path if the UPS fails or becomes overloaded, ensuring uninterrupted operation. The control unit manages the entire system, monitoring power status, regulating voltage, and automatically switching between power sources when needed.
