

# Off-grid pricing for energy storage containers used in Southeast Asian airports

## Overview

---

Rapid increases in electricity consumption in Southeast Asia caused by rising living standards and population raise concerns about energy security, affordability and environmental sustainability. In t.

Can storage support 100% renewable electricity futures in Southeast Asia?

This study is the first to explore the benefits of utilising STORES as a primary storage medium to support 100% renewable electricity futures in Southeast Asia. STORES can facilitate high penetration of variable solar and wind energy in electricity systems through energy time shifting and load levelling.

How long does energy storage last in Southeast Asia?

Within all the scenarios, the duration of storage is in the range of 0-38 h, which means hours or days of short-term energy storage are required in Southeast Asia rather than weeks or months of long-term, seasonal energy storage.

Does short-term off-River energy storage support 100% renewable electricity in Southeast Asia?

Rapid increases in electricity consumption in Southeast Asia caused by rising living standards and population raise concerns about energy security, affordability and environmental sustainability. In this study, the role of short-term off-river energy storage (STORES) in supporting 100% renewable electricity in Southeast Asia is investigated.

What if the energy mix stays unchanged in Southeast Asia?

By contrast, if the current energy mix stays unchanged, the coal and natural gas will heavily rely on imports to cope with the rapidly growing demand for electricity in Southeast Asia, which raises significant concerns about energy security and independence. 3.3. Energy storage requirements
