

EQACC SOLAR

Off-grid type mobile energy storage container for rural areas

Overview

Mobile Solar Container is a prefabricated, all-in-one energy system that integrates solar panels, energy storage modules, inverters, and control units within a standard shipping container, designed to deliver flexible power supply across diverse scenarios. What is an off-grid energy storage system?

Off-grid energy storage systems are used in localities that are far away from populated areas or cities and not connected to any electricity grid. Carbon emissions from the country's main electricity grid have risen since the end of the carbon tax by the largest amount in nearly eight years.

What is a mobile power station?

The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require with fuel and are noisy, this mobile power station uses solar energy with no noise pollution.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

Where is harvested energy stored?

Harvested energy is stored in Lithium LiFePO₄ battery banks with its own programmed BMS (Battery Management System).

Off-grid type mobile energy storage container for rural areas

Mobile Solar Container: Versatile and Efficient Off-Grid Energy

Discover the Mobile Solar Container, a portable and efficient solar energy storage system ideal for remote sites, disaster relief, and off-grid power needs. Easy to deploy and eco-friendly, it ...
