# Off-grid type of foldable containers for port terminals

## Overview

---

River-sea intermodal transport is becoming increasingly popular for container repositioning in hinterland areas, owing to its cost-efficiency and low energy consumption. However, bridge heights and water.

What is a foldable container?

It is, therefore, suitable for use by shipping lines and terminals. Foldable containers save up to 75% space and costs (50-60%). One standard container takes up as much space as four foldable ones. In addition, they are more environmentally friendly. The transport of foldable containers generates 37% less carbon dioxide.

Do Empty shipping containers clog roads and ports?

Empty shipping containers clog roads and ports. Staxxon's foldable containers -- which can be stacked in bundles -- are one solution to this.

Could a new Dutch foldable container technology reduce empty container handling moves?

A new Dutch foldable container technology will be tested in Chicago in 2022 that could demonstrate how to reduce empty container handling moves at ports for trucking and rail while reducing the need for empty container storage at container terminals and on ships.

How many seafold containers are empty?

The SeaFold container opened out and stacked Credit: Compact Container Systems More than a fifth of containers are returned empty to their port of origin empty, according to estimates.
