Outdoor Base Station Security

Overview

Why should a base station be placed indoors?

Positioning the base station indoors also mitigates the challenge of retrieving video evidence if the outdoor cameras are tampered with, guaranteeing stable, secure, and uninterrupted recording. *The base station supports direct storage using SD cards ranging from 16GB to 256GB.

How much storage does the base station support?

*The base station supports direct storage using SD cards ranging from 16GB to 256GB. A wireless relay bridge amplifies signal strength and extends reach, ensuring smooth HD playback. The base station is effortless to install, providing extensive coverage with minimal restrictions.

How does a base station work?

The base station is effortless to install, providing extensive coverage with minimal restrictions. When a target event is detected within the monitored area, the base station will promptly sound an alarm to alert the user, ensuring effective risk management.
