# PLC cabinet uninterruptible power supply

## Overview

---

What is an industrial uninterruptible power supply?

The 1609 family of Industrial Uninterruptible Power Supplies is designed for industrial applications – with features required for remote control and operation inside of industrial control panels. • Flexibility to meet most installation scenarios, included control panels typically used in production environments.

What is a dual UPS (uninterruptible power supply)?

To enhance power reliability, dual UPS (Uninterruptible Power Supply) configurations are commonly deployed. However, one key engineering decision is whether to operate these UPS systems in split (independent) mode or parallel (synchronized) mode.

Why is uninterrupted power supply important in industrial automation & process control systems?

In modern industrial automation and process control systems, ensuring uninterrupted power supply is critical, especially for sensitive instrumentation such as Distributed Control Systems (DCS), Safety Instrumented Systems (SIS), and Programmable Logic Controllers (PLC).

What is a cu8130-0120 power supply?

Two 9-pin connectors with push-in connection for cables with a cross-section of 0.14 mm<sup>2</sup> to 1.5 mm<sup>2</sup> or AWG26 to AWG16. CU8130-0120 is a battery-backed, uninterruptible power supply (UPS) providing up to 15 Wh with a maximum output power of 110 W. If the external 24 V DC.
