PV Module Site BESS Price

Overview

Is Bess a key driver of solar PV deployment & utilisation?

CEF considers BESS a key driver of increasing solar PV deployment and utilisation in the coming years — see Section 1.4. In 2024, the BESS market saw unprecedented growth.

How much does a PV module cost in China?

According to price analysis firm InfoLink: “Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark.” The results of the China Datang Group’s 2025-2026 PV module framework. Image: Datang.

How much will PV modules cost in 2025?

On 11 March 2025, the results of the China Datang Group’s 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W (US\$0.1/W), and some modules priced as high as RMB0.75/W (US\$0.11/W).

Why are solar PV & Bess prices so low?

Global solar PV and BESS manufacturing is in severe overcapacity, driving record-low prices through intensified competition. China’s dominance in both sectors is now unassailable, with its scale, integration, and cost advantages forcing market consolidation and straining manufacturers in the US, and EU.
