Pack battery export demand

Overview

How big is the battery pack market?

Enjoy complimentary customisation on priority with our Enterprise License! The battery pack market size is forecast to increase by USD 124.4 billion at a CAGR of 14.48% between 2023 and 2028. The market is experiencing significant growth, driven by several key trends and factors.

How is the global battery market advancing?

The global battery market is advancing rapidly as demand rises sharply and prices continue to decline. In 2024, as electric car sales rose by 25% to 17 million, annual battery demand surpassed 1 terawatt-hour (TWh) – a historic milestone.

Does battery supply exceed global demand?

Although battery supply may exceed demand at the global level, the picture is more nuanced and varied by region. Some countries have excess capacity—meaning more than enough to satisfy local demand—while others rely on imports to alleviate local shortages. This regional view could become critical if more countries try to localize production.

Will China tighten export controls on lithium battery materials & production equipment?

Following China's recent decision to tighten export controls on lithium battery materials and production equipment, industry leaders in India view the development as both a challenge and a catalyst.
