

EQACC SOLAR

Peak-valley off-grid solar container battery

Overview

What is solar energy storage?

An intelligent comprehensive energy solution, which realizes the reasonable cooperation between wind, solar, energy storage battery, power grid, and diesel generator, makes scientific use of all kinds of mobile energy storage and provides users with green, low-cost, convenient, and high-quality power services.

What is Sunway ESS battery energy storage system (BESS)?

Sunway Ess battery energy storage system (BESS) containers are based on a modular design. They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects.

What is a containerised energy storage system (BESS)?

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes. For installation manual, technical datasheet, inverter adjustment/testing or configuration, please send us inquiry.

What is the energy storage capacity of a user-side energy storage project?

The total installed capacity of this user-side energy storage project is 4.6MW/9.89MWh, with 2 grid connection points established. It is equipped with a total of 46 sets of BRES 100kW/215kWh energy storage systems, enabling the full absorption of stored energy during peak periods and reducing enterprise electricity expenses through peak shaving.
