

EQACC SOLAR

Portable Outdoor Solar Air Conditioner

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

Overview

Are solar-powered air conditioners eco-friendly?

Solar-powered air conditioners offer eco-friendly cooling with potential energy cost savings and reduced carbon footprints. Top models feature multi-functionality, including cooling, fan, and humidification capabilities for versatile use.

Can you use solar-powered air conditioners in apartments or rental properties?

You can use solar-powered air conditioners in apartments or rental properties, but there are considerations. These units often require roof access for panel installation, which may be restricted in multi-unit buildings. Portable solar A/C systems are available, utilizing smaller panels that can be placed on balconies or windows.

Are solar-powered air conditioners energy efficient?

Solar-powered air conditioners typically offer comparable cooling efficiency to traditional units, with Energy Efficiency Ratios (EER) ranging from 10 to 13. However, their performance can be affected by solar panel efficiency and available sunlight.

Can a solar-powered air conditioner operate without sunlight?

Solar-powered air conditioners can operate without sunlight by utilizing energy storage systems, typically lithium-ion batteries. During daylight hours, excess solar energy is stored in these batteries. When sunlight isn't available, your AC draws power from the battery bank.
