Power Banks and Portable Generators

Overview

What are AC power banks & generators?

AC Power Banks and Generators are portable power solutions designed to give power to devices with 240v Australian plugs. These power banks range in size from 24000mah ideal for laptops and small digital devices all the way up to 3000 watt units ideal for powering small base camp set ups and off grid cabins or caravans.

What is the best load bank for a generator?

The typical radiator mounted load bank is 50% to 70% of the generator set kW capacity. If a client requires 100% rated load bank, the safest option is to go with a freestanding permanent load bank as described above.

Where can I buy power banks?

Head over to Ebay's clearance section and find power banks from top brands such as Anker, Remax, and Sunnydeal. Ebay also offers flexible credit on orders over £99. Want deals & discounts automatically?

.

Can a generator be used indoors?

Generators run on gas or propane and produce more power, but they're louder, need ventilation, and can't be used indoors. The right choice depends on what you need to power, where you'll use it, and how often.
