

**EQACC SOLAR**

# **Price of a 20kW collapsible container for port use**

## Overview

---

How much do shipping containers cost?

There are several options available: Cargo-worthy 20ft dry containers. Prices range from \$500 to \$3,000. Cargo-worthy 40ft dry containers. Expect to pay between \$1,000 and \$3,500. 40ft high cube (HC) cargo-worthy containers. Shell out between \$1,500 and \$4,000. The condition of the container greatly influences how much shipping containers cost.

Are new shipping containers more expensive than used?

New containers are typically more expensive as they are in perfect condition and ready for long-term use. Used containers are less costly but have some wear and tear. Shipping container sizes and prices are directly linked to each other. The price also depends on how well the container has been maintained over time.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

How much does a 40 ft container cost?

Now, if you need a brand new 40ft container, you may part with \$1,500 to \$4,000. The 40ft high cube container will set you back anywhere from \$2,000 to \$6,000. A new container, with its fresh-off-the-factory-floor feel, naturally costs more than its seasoned counterparts.
