Price of outdoor wind power base stations in Japan

Overview

How much does a wind turbine cost in Japan?

Price of wind turbines contracted in the second half of 2020. When compared to average installation costs for onshore wind power globally during the same period (BNEF 2021), which are 149,000 yen/kW, Japan's installation costs are fairly high (Figure 12).

How much wind power will Japan have in 2021?

Installed onshore wind capacity in Japan is approximately 5 GW at the end of 2021, and in the long-term energy supply-and-demand forecasts, it is projected to increase to around 16 GW by 2030 (in the "enhanced policy responses" scenario). Even so, onshore wind power would still only account for 3% of electricity generation as forecast for 2030.

Can onshore wind power costs be reduced?

This study analyzed technology trends and costs for onshore wind power in Japan over the six years from 2016 to 2021. Below is a summary of the findings gained from this study which offers insights into the potential of reducing onshore wind power costs. Steady increase in wind turbine size was observed in Japan.

How much wind energy does Japan have?

Japan's geography has an estimated capacity of around 550 gigawatts of offshore wind capacity. However, wind energy still only contributes to around one percent of the energy generation in the country and the progress is sluggish.

Wind energy in Japan

Maximum output of wind power stations Japan 2025, by prefecture
 Maximum capacity of wind power plants in Japan as of February 2025, by prefecture (in 1,000 kilowatt)

Onshore wind electricity FIT price

per kilowatt hour Japan

For fiscal year 2027, the FIT purchase price for onshore wind electricity (under ** kilowatt) was set at **** Japanese yen per kilowatt hour.

Japan Wind Energy Market

Top Companies in Japan Wind Energy Market
 Market Dominated by Diversified Energy Conglomerates
 Innovation and Localization Drive Market Success
 The Japanese wind energy market features a mix of established global players and domestic powerhouses, including MHI, Vestas Japan, Siemens Gamesa Renewable Energy, Japan Renewable Energy, Marubeni Corporation, Sumitomo Corporation, and Eurus Energy Holdings. These companies are driving innovation through adv...
