# Price quotation of Eastern European energy storage power supply field

## Overview

---

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. What is the European energy inventory storage dataset based on?

Please wait. Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. Wood Mackenzie Limited, subject to any additional data modifications and/or input provided by the EC or any of its authorised 3rd party contributor.

How much does battery storage cost in Europe?

The landscape of utility-scale battery storage costs in Europe continues to evolve rapidly, driven by technological advancements and increasing demand for renewable energy integration. As we've explored, the current costs range from €250 to €400 per kWh, with a clear downward trajectory expected in the coming years.

Why are electricity prices falling in Europe?

oad and PPA price assessments (EUR/MWh) Since our last update in February 2025: Forward electricity prices have declined across most European countries, primarily driven by falling TTF contract prices for 2026. This drop in gas prices is supported by increased European gas storage levels, although overall storage le.

Which European countries offer preferential loans for storage projects?

National-level incentives vary across European countries, with Germany's KfW Development Bank offering preferential loans with interest rates as low as 1% for large-scale storage projects.
