It can cost between R506.06 and R1686.87 per breaker, while standard circuit breakers are around R168.69 per breaker.

What is a circuit breaker used for?

The device is designed to protect against electric shock during human contact with the surface of the equipment or its parts that conduct current. What characteristics should I look for when choosing a circuit breaker?

.

How to choose a circuit breaker?

The circuit breaker is selected based on the values of the total leakage current and the rated current. The best electric machines are those in which the maximum switching capacity for devices in the group is 6 kA. The same indicator for terminal devices should be at least 3 kA.

What happens if a circuit breaker breaks?

In the event of a break, the machine loses its supply voltage. In this case, the circuit breaker loses its working capacity. It is possible to provide excellent protection against the current that has gone out of control by mounting separate circuit breakers on each branch that consumes electrical energy and has excellent loads.
