

EQACC SOLAR

Resort uses ultra-large capacity smart photovoltaic energy storage containers

Overview

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is a 3MWh energy storage system?

It also has a BMS system, PCS, fire protection system, air conditioning (HVAC) system, container and container auxiliary systems, etc. The 3MWh energy storage system is very suitable for buildings, factories, towns, supermarkets, large homesteads, hotels, resorts, etc.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
