

EQACC SOLAR

Reykjavik emergency energy storage power supplier

Overview

When did the Reykjavik Electricity Authority start?

The operation of the Reykjavik Electricity Authority began formally in 1921, when a hydroelectric power station was inaugurated on the Ellida river. The distribution system was enlarged to keep pace with the rapid increase in the population of the capital during the 1920's and soon the Ellida station cope with the demand.

When did Akureyri become a National Power Company?

The National Power Company, with an equal participation of the capital and the state, was founded in 1965. It took over the operation of the Sog Station, the reserve station and the high voltage distribution system. The Akureyri municipality became a shareholder in 1983, thus making the whole country a single electricity distribution area.

What is a reserve steam power station?

A reserve steam power station, powered with coal and oil was built on the Ellida river (Ellidavatn) in 1948. Its capacity was initially 7,500 kW and waster raised to 19,000 kW. The reserve station drew its cooling water from the Ellida river and provided the District Heating Utility with an extra supply of hot water.
