Riga Wind Power System Battery

Overview

Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Who financed the battery energy storage system project?

The battery energy storage system (BESS) will be connected to the Latvian electricity transmission system this autumn. The total investment in the project amounts to €7 million. The project has been financed by OP Corporate Bank. Utilitas Wind has been working on the energy storage battery system project for two years.

How much electricity does Utilitas wind generate?

Utilitas Wind has an installed capacity of 78.8 MW in Latvia from autumn 2022, generating 171 000 MWh of electricity in 2023, enough to cover the electricity consumption of 56 000 households. In early 2024, Latvenergo AS acquired the Telšiai wind farm project in Lithuania, with a capacity of 124MW, built by Utilitas Wind Ltd.

Is Utilitas wind Sia ready for future challenges?

We are ready to continue our contribution to the development of the energy supply system in line with future challenges," says Renārs Urbanovičs, Member of the Board of Utilitas Wind SIA.
