

# Riyadh containerized energy storage policy update

## Overview

---

Will Saudi Arabia be able to deploy battery energy storage systems by 2030?

According to Saudi Energy Minister Prince Abdulaziz bin Salman, the nation has set a goal of deploying 48GWh of battery energy storage systems by 2030. This ambitious target not only supports Saudi Arabia's energy transition but also injects fresh momentum into the global renewable energy and energy storage markets.

How big is BYD energy storage & Saudi Electricity Company?

Recently, BYD Energy Storage and Saudi Electricity Company successfully signed the world's largest grid-scale energy storage projects contracts with a capacity of 12.5GWh at the time. Combined with the previously delivered 2.6GWh project, the total cooperation now has amounted to a massive 15.1GWh of projects.

How will Saudi Arabia's energy storage system work?

The 12.5GWh energy storage systems will be fully integrated into Saudi Arabia's power transmission network system, playing a crucial role in addressing the challenges accumulated by the increasing number of renewable energy power generation systems, ensuring stable power supply, and meeting peak energy demand.

How big is BYD energy storage?

BYD Energy Storage announces that it has successfully signed the world's largest energy storage projects contracts with having a capacity of 12.5GWh at the time. Combined with the previously delivered 2.6GWh project, the total cooperation now has amounted to a massive 15.1GWh of projects.
