# Roman Grid Energy Storage Policy

**12.8V 100Ah**

## Overview

---

Are regulatory hurdles affecting energy storage projects in Europe?

Simple regulatory hurdles hamper the growth of energy storage projects across Europe. When these hurdles do not also apply to fossil generators, they even put energy storage at a competitive disadvantage. This practice imposes undue financial burdens to energy storage projects.

What is Romania's solar PV target?

21-2030 Update – First draft version For solar PV, Romania's 2030 target is 8.3 GW, of which 2.5 GW in rooftop installation and 5.8 GW in utility-scale projects. Although an improvement on the previous iteration of the NECP, which projected a total of 5.1 GW, the rooftop target is not.

What is electrothermal energy storage?

For example, electrothermal energy storage stands out for its capacity to electrify heat while storing energy, making it well-suited for meeting the continuous and large-scale heat demands of industrial sites. Together with other solutions, it plays a vital role in a holistic approach to grid stability and renewable energy integration.

Who is the energy storage coalition?

The Energy Storage Coalition is constituted of four key clean energy actors: Breakthrough Energy, The European Association for Storage of Energy, SolarPower Europe, WindEurope.
