Rooftop PV Inverter Specifications

Overview

Work under this section shall include the design, supply of materials, installation, commissioning, testing and delivery in perfect running conditions of the 6kwatts (2x3Kwatts) Rooftop Mounting Solar Power Syst.

What is a solar rooftop photovoltaic (SPV) power plant?

6Kwatts Solar Rooftop Photo Voltaic (SPV) power plant consists of SPV array, Module Mounting Structure, Power Conditioning Unit (PCU) consisting of Maximum Power Point Tracker (MPPT), Inverter, and Controls & Protections, interconnect cables, Junction boxes, Distribution boxes and switches. PV Array is mounted on a suitable structure.

What is a rooftop inverter?

inverter to the building or grid. Rooftop cables are typically exposed to the environment, and should therefore be able to withstand UV light, ozone, heat and rain or hail without degrading. Cables used in PV installations are specifically manufactured to be UV resistant. In general, cables with a large diameter result in lower loss.

What are the civil works for solar PV rooftop system?

The civil works for the proposed Solar PV rooftop System shall include, design of the Roof Top Solar PV mounting frame structures and installation.

How does a rooftop solar PV system work?

converts solar energy into electricity. This can be used to meet the building's own energy consumption requirements or, in certain situations, fed back into the electrical grid. Rooftop solar PV systems are distributed electricity generation options, which help to meet a building's energy needs, or provide electricity with
