Distributor of Solar Powered Water Pumps & Systems for Water Wells. - Advanced Power Inc. Have an account?

Log in to check out faster. API's solar powered water and well pumps are the affordable and reliable way to pump water. For nearly 35 years, our solar-powered submersible water pumps have been at the core of our business.

What is a solar powered water pump?

A solar powered water pump is an eco-friendly, off-grid solution that uses solar energy to move water from wells, rivers, ponds, or tanks—without needing electricity or fuel. Perfect for farms, homes, and remote areas, these pumps are powered by photovoltaic panels and come in both surface and submersible options.

Why should you choose a solar water pump system?

Solar water pump systems can be very beneficial when used in agricultural, irrigation, domestic, and industrial settings. This is a clean way to pump water and increase production and efficiency. Be the first to know about new products and exclusive offers. Choosing a selection results in a full page refresh. Need help?

.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.
