Overview

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

How can a microgrid be used in a construction site?

Solar, storage and diesel generator combined microgrid used in areas without electricity. Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply.

Which variables add costs to projects?

Other variables add costs to projects. For the sake of simplification, this survey covers capital expenditure (CAPEX) costs. For example, some costs that aren't covered in this analysis include: Developer premiums and development expenses - depending on the project's attractiveness, these can range from £50k/MW to £100k/MW.
