

**EQACC SOLAR**

# **San Jose solar Energy Storage Power Production**

## Overview

---

Who uses solar power in San Jose?

The active project supplies power to the city of San Jose, Southern California Edison, Pacific Gas & Electric, the Clean Power Alliance, and Starbucks corporation, among others. The project's first phase added 346 MWac of solar modules and 1.5 GWh of battery storage.

How much does solar cost in San Jose?

The cost per watt makes it easier to compare prices between quotes and gives you a better idea of how fairly the system is priced. The average price of solar is about \$2.14 to \$3.22 per watt in San Jose, so anything in that range is a fair price.

How much solar power does California have?

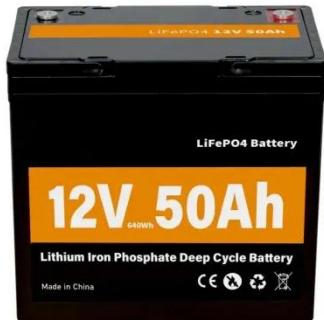

It holds a capacity of 875 MWdc solar, and nearly 3.3 GWh of energy storage. It has a 1.3 GW interconnection capacity. California's grid is expected to receive enough electricity to power the equivalent of about 238,000 homes from the project. This leads to an estimated 320,000 tons of carbon dioxide emissions abated annually.

Who is involved in the Edwards & Sanborn solar & energy storage project?

From pv magazine USA Terra-Gen and Mortenson have announced the activation of the Edwards & Sanborn Solar + Energy Storage project, the largest solar-plus-storage project in the United States. Mortenson served as engineering, procurement, and construction contractor for the project.
