

EQACC SOLAR

Saudi Arabia 5g solar module project

Overview

Will desert technologies build a solar cell plant in Saudi Arabia?

Solar PV infrastructure company Desert Technologies intends to build a solar cell and module assembly plant in Saudi Arabia. The plant will have an annual nameplate capacity of 5GW, of which 3GW for solar cell capacity and 2GW for PV modules. However, the company did not disclose what technology will be used for the solar cells.

How much will desert technologies invest in a 5GW solar PV plant?

Recently, Desert Technologies announced plans to invest SAR 750 million (\$200 million/EUR 1,834 million) to build a 5GW solar PV module plant in the Third Industrial Zone in Jeddah, on the west coast of Saudi Arabia.

Does Saudi Arabia have a solar PV manufacturing plan?

This is the latest PV manufacturing plan in Saudi Arabia, and the Middle East, which has seen an increase of announcements this year. In July, the Saudi Arabia's Public Investment Fund (PIF) signed two solar PV manufacturing agreements that would see 30GW of domestic manufacturing capacity built in the country, from ingots to modules.

How will Modon's solar plant help Saudi Arabia's non-oil export market?

The 170,000 square metre complex, supplied by Modon, will include 2GW of solar modules and 3GW of solar cell production lines. Desert Technologies said last week that the solar modules produced at the plant would meet growing local demand for solar solutions and strengthen Saudi Arabia's position in global non-oil export markets.
