

**EQACC SOLAR**

# **Self-service BESS outdoor base station power supply**

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT  
IN OFF-GRID MODE

✓ CONVENIENT OPERATION  
& MAINTENANCE

✓ PRE-WIRED

## Overview

---

Highjoule's base station BESS is designed for outdoor deployment, supporting IP65/IP67 protection, wide operating temperature ranges (-20°C to 60°C), and anti-theft, anti-corrosion, and anti-vibration features. Do I need backup power for a Bess auxiliary load?

For certain projects, backup power must be provided for the BESS auxiliary load as required by the BESS supplier or fire codes. Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation.

Does Bess require uninterrupted power?

Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation. BESS fire safety standards, such as NFPA 855, outline minimum requirements for backup power for fire safety systems.

What are Bess auxiliary loads?

BESS auxiliary loads typically fall into the following three categories: ● Control and communication equipment, such as the battery management system and network switches; ● Thermal management systems, such as HVAC or chillers; ● Fire safety systems, such as fire alarms, control panels and gas ventilation systems (if present).

What is a Bess power amplifier?

BESS functions as a "Power Amplifier" at construction sites when it is continuously charged, converting a small portion of temporary power supply to provide high output current for equipment with high instantaneous current requirements. BESS is best suited for following equipment with intermittent loads but high current requirements.

## Self-service BESS outdoor base station power supply

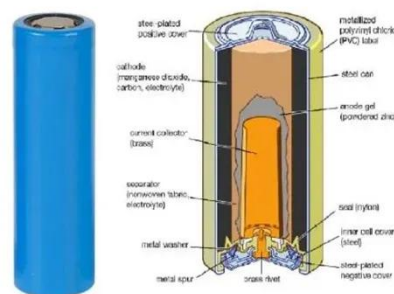

### Base Station Energy Storage

A base station energy storage system is a compact, modular battery solution designed to ensure uninterrupted power supply for telecom base stations. It supports stable operations during grid ...
