

**EQACC SOLAR**

# **Senegal Folding Container 15kW**

## Overview

---

Will LNG be shipped to a Powership off Senegal?

A first cargo of LNG has been shipped into a floating storage and regasification unit set up several years ago, but not yet in operation. The unit will serve a powership off Senegal as the country moves to switch power generation from oil to gas. TradeWinds is the essential source of global shipping business news and commentary.

Can LNG be used for power generation in Senegal?

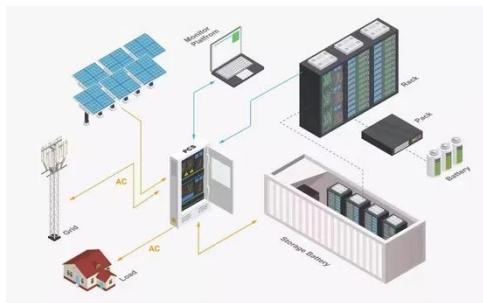

The use of LNG for power generation marks a significant step in diversifying Senegal's energy mix, following the country's first offshore oil production at Woodside's Sangomar development in 2024 and LNG production from the BP-led Greater Tortue Ahmeyim Phase 1 project in February 2025, developed jointly with Mauritania.

Why is the ship-to-ship LNG transfer important for Senegal's energy sector?

Ayman Bouderbala stated: "The successful completion of the ship-to-ship LNG transfer and subsequent power generation is a groundbreaking achievement for Senegal's energy sector." The project enhances energy reliability and supports Senegal's growing electricity needs while prioritizing sustainable energy solutions.
