Senegal Site Energy PV Site 6

25MWh

Overview

Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

When will a solar power plant be built in Senegal?

“This agreement paves the way for the construction to begin in May 2025, with the deployment of a 60MWp photovoltaic plant coupled with a 90MWh storage system.” Voltalia is to supply the PV infrastructure for the solar power plant, which will operate on Senegal’s national grid managed by SENELEC.

Why is senergy a good investment in Senegal?

Overall, the Senergy project is a significant contributor to Senegal’s installed solar PV capacity and is providing clean and affordable power to more than 200,000 Senegalese people. A dedicated team is responsible for supervising Meridiam’s four solar plants in Senegal. The plants therefore benefit from pooled resources and return of experience.

How can a photovoltaic system benefit Senegal?

An array of 92,000 photovoltaic panels has been installed and around 30MWp of renewable energy can now be utilised – securing a valuable and sustainable supply of low-cost electricity for Senegal, while providing an uplift to the local economy.
