Shopping mall energy storage project

Overview

What is Tesla's Shanghai megafactory project?

The project will feature a 6-MW photovoltaic power generation system and an 8-MWh energy storage system. Tesla (NASDAQ: TSLA) Shanghai Megafactory will be equipped with an energy storage system that will store green power like a "giant power bank" and supply power when needed.

How much energy does a shopping mall use?

Shopping malls consume a significant amount of energy – up to 650 kWh per square meter each year. For comparison, an energy-efficient office building may consume only 30-40 kWh per square meter.

What's going on at Shanghai's New megafactory?

This is the first such large-scale project in Shanghai, featuring a 6-MW photovoltaic power generation system and an 8-MWh energy storage system, according to the report. All of its energy storage units will use Tesla's Megapack electrochemical energy storage system produced at the Shanghai Megafactory.

How many kilowatts can a Tesla Megapack store?

Tesla's energy storage plant in Shanghai's Lin-gang Special Area commenced operation on Feb 11, as the assembly line started the production of the first Megapack unit. The Megapack, which is an advanced battery system designed for large-scale energy projects, can store more than 3,900 kilowatt-hours of electricity in a single unit.
