Slovakia New Energy Base Station

Overview

Slovakia is preparing to sign an intergovernmental agreement with the US that would pave the way for Westinghouse Electric Company to build a new nuclear reactor unit at the existing Bohunice site, prime minister Robert Fico said, according to press reports. Does Slovakia have a nuclear power plant?

Slovakia heavily relies on nuclear energy and currently generates over 80% of its electricity at two nuclear plants. The Slovak plan reflects recent nuclear expansion in Central and Eastern Europe. The neighboring Czech Republic has signed a contract with Korea's KHNP to build two more nuclear reactors.

Will the US build a nuclear reactor in Slovakia?

(AP Photo/Denes Erdos) BRATISLAVA, Slovakia (AP) — Slovakia's populist Prime Minister Robert Fico said Tuesday his government has approved an agreement with the United States to build an additional nuclear reactor. Fico announced the multi-billion-dollar deal during a speech at an annual nuclear conference in the Slovak capital.

Is Westinghouse a long-term partner of the Slovak nuclear industry?

In response, Westinghouse stated it is proud to be a long-term partner of the Slovak nuclear industry and welcomes closer cooperation between the US and Slovak governments on nuclear energy. "We stand ready to help Slovakia achieve its future nuclear energy objectives," the press department of Westinghouse Electric Company wrote in its statement.

Does Slovak Republic have a low-emissions electricity system?

The Slovak Republic's low-emissions electricity system is a cornerstone of its energy security and helps decarbonise hard-to-abate sectors, but more progress on renewables and energy efficiency is needed.
