

EQACC SOLAR

Small solar power generation system in Douala Cameroon

Overview

Are solar energy systems a sustainable solution in Cameroon?

In Cameroon, where energy demands are growing rapidly alongside economic development, solar energy systems offer a sustainable and efficient solution to meet the country's energy needs.

How to optimize solar generation in Douala Cameroon?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Douala, Cameroon as follows: In Summer, set the angle of your panels to 12° facing North. In Autumn, tilt panels to 11° facing South for maximum generation.

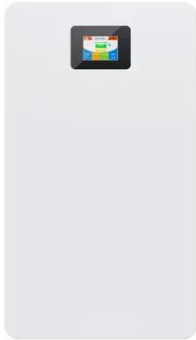

How much solar power does Cameroon produce a year?

Seasonal solar PV output for Latitude: 4.0575, Longitude: 9.691 (Douala, Cameroon), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 4.20kWh/day in Summer.

Where are solar photovoltaic power plants located in Cameroon?

For this purpose, we have chosen the solar photovoltaic power plants in the Far North and Littoral regions of Cameroon, where we will estimate, for each of them, the influencing parameters, followed by an exergy and economic analysis, with a simulation at the end of the chain.
