Solar Energy Ecosystem in Lyon France

51.2V 150AH, 7.68KWH

Overview

What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

What makes Lyon a great region for cleantech?

The cleantech sectors, driven by full innovation and growth ecosystems, are strategic for the Lyon metropolitan area. A region with a reputation for excellence, where professionals in the chemicals & materials industries, transport & mobility and energy transition sectors find the right conditions for sustainable growth.

Does Lyon Metropolis have a solar cadastre?

Lyon Metropolis also developed a solar plan in 2022 and a solar cadastre to help professionals, inhabitants and cities to identify the solar potential of any kind of building. Many energy communities have arisen and contribute to photovoltaic development.

What is the energy master plan for Lyon Metropolis?

Lyon Metropolis made its energy master plan in 2019 with targets for 2030. ALEC Lyon is at the side of Lyon Metropolis, the City of Lyon, and many other cities to develop their climate strategies and initiate specific and practical actions. Lyon Metropolis is a large metropolitan area composed by 58 cities with big urban development programs.
